## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 2 is drawn to a method of diagnosing a disorder in the brain stem, classified in class 600, subclass 300.
- II. Claim 5 is drawn to a method of treatment of a disorder brain stem, classified in class 600, subclass 300.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions diagnosing and treatment has different modes of operation, different functions and different effects.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

The inventions are distinct, each from the other because of the following reasons:

A telephone call was not made to Patrick F. Bright because a phone number was not provided on the CPA Request Transmittal, as a result the request an oral election to the above restriction requirement cannot result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
